## Sebewaing River, MI

### Project Features

- Located on Saginaw Bay in the thumb of Michigan on the west shore of Lake Huron, about 20 miles northeast of the mouth of the Saginaw River
- Authorization: Rivers & Harbors Act of 3 Jun 1896
- Shallow draft recreational project
- Project depth is 8 feet
- Over 15,000 feet of maintained federal channel
- A portion of the Sebewaing Confined Disposal Facility (CDF) was turned over to the local community.
- Major stakeholders: U.S. Coast Guard, Village of Sebewaing, Michigan DNR, and Crooked Creek Marina

### Project Requirements

- Requires periodic maintenance dredging on a 3-to5-year cycle of approximately 9,000 to 15,000 cubic yards.
- Portions of the river were last dredged in 2015 with funds provided by the State of Michigan under a contributed funds agreement with USACE. Maintenance dredging is currently required.
- Sediment sampling funding provided in FY23.
- A dredged material management preliminary assessment is required.
- Flood risk management component (levee system) of the project requires repairs. Levee along the north embankment underwent a major reconstruction in 2012. The south embankment requires repair.
- Engineering and design for repairs to the South Levee will be conducted with FY23 BIL funds. Construction funding for these repairs have been provided by the FY24 BIL.
- Minor maintenance on the North Bank is required including repairs to spalling concrete, earthen bank repairs and installation of stoplog lifting equipment.

- Ice jam removal may be required annually, depending on water levels and weather.
- Several access points in the flood risk reduction area require the placement of stoplogs in winter to prevent flood damage to private property. Funding is needed to develop mobile stoplog placement equipment.

### Consequences of Not Maintaining the Project

- Loss of jobs locally
- Loss of recreational and charter fishing in the area

### Transportation Importance

- This project serves as an important harbor of refuge and supports charter fishing and recreational navigation interests.
- The local community has established a significant infrastructure around the harbor facilities that generates income from harbor users and visitors to the area.
